**Ballistiflex**   
Anti-return curtains  
for shooting ranges

 **extruflex**  
flexible vinyl extrusion world leader

## SELF-HEALING ANTI-RETURN CURTAINS

Our curtains are made of a **fire retardant high density polymer** capable of withstanding ammunition fire thanks to its so-called «**Self-healing**» capacity.

The warhead goes through the curtain and the hole created immediately closes under the effect of heat generated.

Our curtains also offer the possibility of being used as projection screens in the frame video training.

The BALLISTIFLEX solution adapts to your ammunition recovery systems: bullet traps, shooting ranges, ...

## OUR STRENGTHS

Our curtains guarantee the **safety of shooters** and play an important role in the **reduction of noise pollution**.

**Shooter's safety**  
Anti-return action

**Noise reduction**  
up to 35dB

**Fire retardant**  
M2 classification

**Facilitates the retention of shooting dust**

**Available in reinforced version**  
(polyester weft)

## DIMENSIONS

Our non-return curtains are available in the following dimensions:

Width: 60cm to 220cm

Thickness: 5mm, 7mm, 8mm or 10mm.

**Rolls**

**Ready-to-install curtains**

Adapt to existing fastening systems.  
Installation of metal eyelets for the suspension, upon request.

## Colors available

Customization upon demande
